

Dear Parent:

The students in Advanced Computer Concepts are working on a video project. The key objective is to teach students standard techniques of video production so they can more easily create video projects in the future for school or for the real world. They are encouraged to be as creative as possible with this project and there is no assigned subject so they are to create their own material.

Since the project may result in video of your student, it is required that I only use students whose parents/legal guardians have consented in writing to have their students participate. To protect their privacy, neither the video or web materials will include reference to their last name, home address, or phone number. Additionally, we will not publish the name of the child on any products created. Please sign below if you wish to give me permission to include your student in this project. The students are not required to be in the video to receive full credit on this project.

With my signature below, I give permission for my child to have his/her likeness displayed online in the form of video or still images. I hereby release Mr. Miller and Yorkville CUSD #115 from any and all liability and legal or equitable claims of any kind related to such work being published on the Web. I understand that my child will be identified in video by first name only.
